

Wildcard Pro SSL Certificate

The Wildcard Pro SSL Certificate can be used to secure multiple websites with one single SSL Certificate. For organizations that host a single domain name but several sub-domains (e.g. [webmail.yourdomain.com](#)) this is an attractive and efficient way to secure all the sub-domains. You don't need to worry about the technical actions, costs and time, required for managing multiple SSL Certificates on your server.

Features

- Reliable Root
- Extremely fast issuance
- 99% browser compatibility
- Till 256 bits encryption
- Includes Replacement Warranty
- Wildcard certificate

Benefits

- Excellent priced
- Professional support
- Payment after invoice or online
- Online management portal
- Automated applications (API)

Support for mobile phones and PDAs

With Outlook Mobile Access, you can easily view, change and answer all your email, calendars, contacts and tasks in Microsoft Exchange. If you want to make your own secure website compatible for use on mobile equipment, you require a Pro SSL Certificate.

Includes Replacement Warranty

An SSL Certificate will be re-issued free of charge with a Wildcard Pro SSL Certificate. This allows you to sign your certificate again at all time. For example after the loss of your private key, which often happens during a server crash or when your web site moves to a different server.

Till 256 bits encryption

Data you send will be encrypted at all SSL Certificates. They can not be read by third parties, or intercepted or changed by others. The gravity of the encryption depends on the used server and web browser and is currently up to 256 bits.

Reliable Root

It is very important that your SSL Certificate is published on a reliable Root. The Wildcard Pro SSL Certificate is therefore issued on the GeoTrust DV SSL CA Root. This is a reliable Root embedded in most browsers for years already.

The procedure

Make the request for the certificate on the website of [ssl.nu](#).

You will receive a confirmation email. Select the link to activate the certificate.

Install the SSL Certificate and Site Seal.

To verify the completed installation, use the Site Check.

Prices

By purchasing an SSL Certificate for multiple years you don't save only an attractive amount annually. The installation of the certificate is then required only once, so you will not have to install the certificate every year again.

Period	Price	Profit
1 year	€ 999,00	
2 years	€ 1.599,00	€ 399,00
3 years	€ 1.999,00	€ 998,00
4 years	€ 2.520,00	€ 1.476,00
5 years	€ 2.995,00	€ 2.000,00
6 years	€ 3.480,00	€ 2.514,00

*This product is also available in the [reseller](#) programme.

Site Seal

Place our free Site Seal and show visitors of your web site that you are properly protected. It offers visitors of your website more confidence and more confidence means more sales.
